welcome to *rialtech group* –  
an australian manufacturer and  
wholesaler of innovative access systems  
and quality marking products for the  
construction and mining industries

**Ingenuity and integrity are the hallmarks of Rialtech's approach to servicing the access and marking needs of industry.**

Rialtech is building on the success and proven results of our Altech access systems, which have been known and available to the construction industry for several years. Altech is a brand synonymous with outstanding performance; backed by intensive research and development, careful design and quality-controlled Australian manufacturing.

In line with our policy of ongoing service to industry, we are moving to meet a perceived demand for premium quality marking paints at a reasonable price. This new range of professional marking products marketed under our Riteline brand, exhibits the dedication to quality that Rialtech is known for.

Riteline quality and reliability of supply is underpinned by a strategic partnership that Rialtech have formed with a company who have been a leading supplier of marking paint in the UK for over 20 years. Our joint commitment ensures that only premium grade raw materials are used in Riteline marking paint aerosol products which are manufactured in dedicated plants in Asia and Europe.

At Rialtech, we believe that quality and safety should never be compromised, so we ensure the right grade of material is used for each application and all our access systems and marking products are manufactured to Australian standards and for Australian conditions.

mine marking paints

Applications:

Underground mines, including coal mines,  
and any other fire-risk areas.

Surfaces:

Suitable for use on dirt, gravel, rock, stone  
and other mine surfaces.

Riteline mine marking paint is a non-flammable, high-visibility, quick-drying, professional spray paint, specially formulated for writing & marking out in a wide range of fire sensitive applications.

Specially designed to withstand harsh weather conditions, and to enable distinct writing & marking out on dark surfaces.

Specifications:

- |                      |                     |
|----------------------|---------------------|
| High-vis colours     | Non-flammable       |
| Non-clog formula     | Eco-friendly        |
| 400g/500ml aerosols  | Toluene / CFC free  |
| All-angle 360° valve | Benzene / Lead free |
| Horizontal spray     | Recyclable can      |

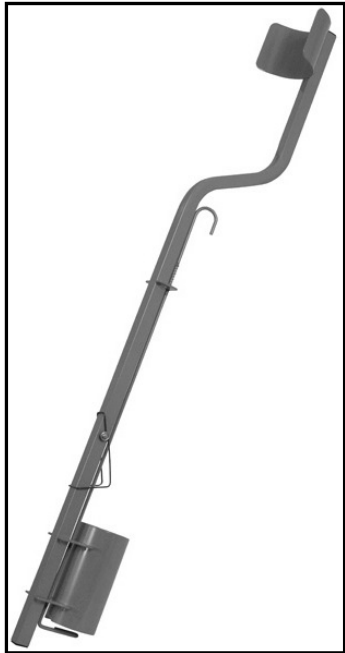

Colours Available:

Standard Colours

|  | FLUORO PINK Code: RLMMFP5 |
|--|---------------------------|

**Long-Reach Holder**

**Roll-Along Holder**

Use of these holders avoids the need to bend over when spraying on the ground. The Long-Reach Holder assists in getting to those hard-to-reach areas. The Roll-Along Holder enables marking out straighter lines when required. To be used with the Riteline Site Marking Paint aerosols.

The Riteline Line Marker enables straighter and more accurate lines. Spray width adjustable between approx. 50mm to 100mm. Has space to store up to 12 cans for swapping over quickly and easily. Folds up compactly to enable convenient transportation. To be used with the Riteline Line Marking Paint aerosols.
